

Design

Most arguments in favor of command line versus graphical user interface (GUI) computing are flawed by system administrator platonism. A command like `cp test.txt /mnt/disk` is, however, not a single bit closer to a hypothetic *truth* of the machine than dragging an icon of the file.txt with a mouse pointer to the drive symbol of a mounted disk. Even if it were closer to the *truth*, what would be gained from it?

The command line is, by itself, just as much an user interface abstracted from the operating system kernel as the GUI. While the *desktop* look and feel of the GUI emulates real life objects of an analog office environment, the Unix, BSD, Linux/GNU and Mac OS X command line emulates teletype machines that served as the user terminals to the first Unix computers in the early 1970s. This legacy lives on in the terminology of the *virtual terminal* and the device file `/dev/tty` (for *teletype*) on Unix-compatible operating systems. Both graphical and command line computing are therefore media; mediating layers in the cybernetic feedback loop between humans and machines, and proofs of McLuhan's truism that the contents of a new medium is always an old medium.

Both user interfaces were designed with different objectives: In the case of the TTY command line, minimization of typing effort and paper waste, in the case of the GUI, use of – ideally – self-explanatory analogies. Minimization of typing and paper waste meant to avoid redundancy, keeping command syntax and feedback as terse and efficient as possible. This is why `cp` is not spelled `copy`, `/usr/bin/` not `/Unix Special Resources/Binaries`, why the successful completion of the `copy` command is answered with just a blank line, and why the command can be repeated just by pressing the arrow up and return keys, or retyping `/mnt/disk` can be avoided by just typing `!$`.

The GUI conversely reinvents the paradigm of universal pictorial sign languages, first envisioned in Renaissance educational utopias from Tommaso Campanella's *City of the Sun* to Jan Amos Comenius

illustrated school book *Orbis Pictus*. Their design goals were similar: *usability*, self-explanatory operation across different human languages and cultures, if necessary at the expense of complexity or efficiency. In the file copy operation, the action of dragging is, strictly seen, redundant. Signifying nothing more than the transfer from *a* to *b*, it accomplishes exactly the same as the space in between the words¹ `test.txt` and `/mnt/disk`, but requiring a much more complicated tactile operation than pushing the space key. This complication is intended as the operation simulates the familiar operation of dragging a real life object to another place. But still, the analogy is not fully intuitive: in real life, dragging an object doesn't copy it. And with the evolution of GUIs from Xerox Parc via the first Macintosh to more contemporary paradigms of task bars, desktop switchers, browser integration, one can no longer put computer-illiterate people in front of a GUI and tell them to think of it as a real-life desk. Never mind the accuracy of such analogies, GUI usage is as much a constructed and trained cultural technique as is typing commands.

Consequently, platonic truth categories cannot be avoided altogether. While the command line interface is a simulation, too – namely that of a telegraphic conversation – its alphanumeric expressions translate more smoothly into the computer's numeric operation, and vice versa. Written language can be more easily used to use computers for what they were constructed for, to automate formal tasks: the operation `cp *.txt /mnt/disk` which copies not only one, but all text files from the source directory to a mounted disk can only be replicated in a GUI by manually finding, selecting and copying all text files, or by using a search or scripting function as a bolted-on tool. The extension of the command to `for file in *; do cp $file $file.bak; done` cannot be replicated in a GUI unless this function has been hard-coded into it before. On the command line, *usage* seamlessly extends into *programming*.

¹ or, in technical terms: arguments

In a larger perspective, this means that GUI applications typically are direct simulations of an analog tool: word processing emulates typewriters, Photoshop a dark room, DTP software a lay-out table, video editors a video studio etc. The software remains hard-wired to a traditional work flow. The equivalent command line tools – for example: `sed`, `grep`, `awk`, `sort`, `wc` for word processing, ImageMagick for image manipulation, `groff`, TeX or XML for typesetting, `ffmpeg` or MLT for video processing – rewire the traditional work process much like `cp *.txt` rewires the concept of copying a document. The designer Michael Murtaugh for example employs command line tools to automatically extract images from a collection of video files in order to generate galleries or composites, a concept that simply exceeds the paradigm of a graphical video editor with its predefined concept of what video editing is. The implications of this reach much farther than it might first seem. The command line user interface provides functions, not applications; methods, not solutions, or: nothing but a bunch of plug-ins to be promiscuously plugged into each other. The application can be built, and the solution invented, by users themselves. It is not a shrink-wrapped, or – borrowing from Roland Barthes – a *readerly*, but a *writerly* interface. According to Barthes' distinction of realist versus experimental literature, the readerly text presents itself as linear and smoothly composed, *like a cupboard where meanings are shelved, stacked, safeguarded*.² Reflecting in contrast the *plurality of entrances, the opening of networks, the infinity of languages*,³ the writerly text aims to make *make the reader no longer a consumer, but a producer of the text*.⁴ In addition to Umberto Eco's characterization of the command line as iconoclastically *protestant* and the GUI as idolatrously *catholic*, the GUI might be called the Tolstoj or Toni Morrison, the command line the Gertrude Stein, *Finnegans Wake* or L.A.N.G.U.A.G.E poetry

of computer user interfaces; alternatively, a Lego paradigm of a self-defined versus the Playmobil paradigm of the ready-made toy.

Ironically enough, the Lego paradigm had been Alan Kay's original design objective for the graphical user interface at Xerox PARC in the 1970s. Based on the programming language Smalltalk, and leveraging object oriented-programming, the GUI should allow users to plug together their own applications from existing modules. In its popular forms on Mac OS, Windows and KDE/Gnome/XFCE, GUIs never delivered on this promise, but reinforced the division of users and developers. Even the fringe exceptions of Kay's own system – living on as the *Squeak* project – and Miller Puckette's graphical multimedia programming environments *MAX* and *Pure Data* show the limitation of GUIs to also work as graphical programming interfaces, since they both continue to require textual programming on the core syntax level. In programmer's terms, the GUI enforces a separation of UI (user interface) and API (application programming interface), whereas on the command line, the UI is the API. Alan Kay concedes that *it would not be surprising if the visual system were less able in this area [of programming] than the mechanism that solve noun phrases for natural language. Although it is not fair to say that 'iconic languages can't work' just because no one has been able to design a good one, it is likely that the above explanation is close to truth.*⁵

Codework by Alan Sondheim, posted to the mailing list "arc.hive" on July 21, 2002⁶

In a terminal, commands and data become interchangeable. In `echo date`, `date` is the text, or data, to be output by the `echo` command. But if the output is sent back to the command line processor (a.k.a. `shell`) – `echo date | sh` – `date` is executed as a command of its own. That means: Command lines can be constructed that wrangle input data, text, into new commands to be executed. Unlike in GUIs, there is recursion in user interfaces: commands can process themselves. Photoshop, on the other hand, can photoshop its own graphical dialogues, but not actually run those mutations afterwards. As the programmer and system administrator Thomas Scoville puts it in his 1998 paper “The Elements Of Style: UNIX As Literature”, *UNIX system utilities are a sort of Lego construction set for word-smiths. Pipes and filters connect one utility to the next, text flows invisibly between. Working with a shell, awk/lex derivatives, or the utility set is literally a word dance.*⁷

⁷ Thomas Scoville. The Elements Of Style: UNIX As Literature, 1998. [Online; accessed 20-July-2015]

In net.art, jodi's *OSS* comes closest to a hypothetical GUI that eats itself through photoshopping its own dialogues. The Unix/Linux/GNU command line environment is just that: A giant word/text processor in which every single function – searching, replacing, counting words, sorting lines – has been outsourced into a small computer program of its own, each represented by a one word command; words that can process words both as data [E-Mail, text documents, web pages, configuration files, software manuals, program source code, for example] and themselves. And more culture-shockingly for people not used to it: with SSH or Telnet, every command line is *network transparent*, i.e. can be executed locally as well as remotely. `echo date | ssh user@somewhere.org` builds the command on the local machine, runs it on the remote host somewhere.org, but spits the output back onto the local terminal. Not only do commands and data mutate into each other, but commands and data on local machines intermingle with those on remote ones. The fact that the ARPA- and later Internet had been designed for distributed computing becomes tangible on the microscopic level of the space between single words, in a much more radical way than in such monolithic paradigms as *uploading* or *web applications*.

With its hybridization of local and remote code and data, the command line is an electronic poet's, codeworker's and ASCII net.artist's wet dream come true. Among the poetic *constraints* invented by the OULIPO group, the purely syntactical ones can be easily reproduced on the command line. *POE*, a computer program designed in the early 1990s by the Austrian experimental poets Franz Josef Czernin and Ferdinand Schmatz to aide poets in linguistic analysis and construction, ended up being an unintended Unix text tool clone for DOS. In 1997, American underground poet ficus strangulensis called upon for the creation of a *text synthesizer* which the Unix command line factually is. *Netwurker* mez breeze consequently names as a major cultural influences of her net-poetical *mezangelle* work “#unix [shelled + otherwise]”, next

to “#LaTeX [+ LaTeX2e]”, “#perl”, “#python” and “#the concept of ARGS [still unrealised in terms of potentiality]”.⁸ Conversely, obfuscated C programmers, Perl poets and hackers like jaromil have mutated their program codes into experimental net poetry.

The mutations and recursions on the command line are neither coincidental, nor security leaks, but a feature which system administrators rely on every day. As Richard Stallman, founder of the GNU project and initial developer of the GNU command line programs, puts it, *it is sort of paradoxical that you can successfully define something in terms of itself, that the definition is actually meaningful. [...] The fact that [...] you can define something in terms of itself and have it be well defined, that's a crucial part of computer programming.*⁹

When, as Thomas Scoville observes, instruction vocabulary and syntax like that of Unix becomes *second nature*,¹⁰ it also becomes conversational language, and syntax turns into semantics not via any artificial intelligence, but in purely pop cultural ways, much like the mutant typewriters in David Cronenberg's film adaption of *Naked Lunch*. These, literally: buggy, typewriters are perhaps the most powerful icon of the writerly text. While Free Software is by no means hard-wired to terminals – the Unix userland had been non-free software first –, it is nevertheless this writerly quality, and break-down of user/consumer dichotomies, which makes Free/Open Source Software and the command line intimate bed-fellows.

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. TO THE EXTENT THIS LICENSE MAY BE CONSIDERED TO BE A CONTRACT, THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

1. Definitions

- Adaptation** means a work based upon the Work, or upon the Work and other pre-existing works, such as a translation, adaptation, derivative work, arrangement of music or other alterations of a literary or artistic work, or phonogram or other sound recording, including cinematographic adaptations or any other form in which the Work may be recast, transformed, or adapted including in any form recognizably derived from the original, except that a work that constitutes a Collection will not be considered an Adaptation for the purposes of this License. For the avoidance of doubt, where the Work is a musical work, performance or phonogram, the synchronization of the Work in timed-relations with a moving image ("syncing") will be considered an Adaptation for the purposes of this License.
- Collection** means a collection of literary or artistic works, such as encyclopedias and anthologies, or performances, phonograms or broadcasts, or other works or subject matter other than works listed in Section 1(g) below, which, by reason of the selection and arrangement of their contents, constitute intellectual creations, in which the Work is included in its entirety in unmodified form along with one or more other contributions, each constituting separate and independent works in themselves, which together are assembled into a Collection. A work that constitutes a Collection will not be considered an Adaptation (as defined above) for the purposes of this License.
- Distribute** means to make available to the public the original and copies of the Work or Adaptation, as appropriate, through sale or other transfer of ownership.
- License Elements** means the following high-level license attributes as selected by Licensor and indicated in the title of this License: Attribution, NonCommercial, ShareAlike.
- Licensor** means the individual, individuals, entity or entities that offer(s) the Work under the terms of this License.
- Original Author** means, in the case of a literary or artistic work, the individual, individuals, entity or entities who created the Work or if no individual or entity can be identified, the publisher; and in addition (i) in the case of a performance the actors, singers, musicians, dancers, and other persons who act, sing, deliver, declaim, play in, interpret or otherwise perform literary or artistic expressions or folklores; (ii) in the case of a phonogram the producer being the person or legal entity who first fixes the sounds of a performance or other sounds; and, (iii) in the case of a broadcast, the organization that transmits the broadcast.
- Work** means the literary and/or artistic work offered under the terms of this license including without limitation any production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression including digital form, such as a book, pamphlet and other writing; a lecture, address, sermon or other work of the same nature; a dramatic or dramatico-musical work; a choreographic work or entertainment in dumb show; a musical composition with or without words; a cinematographic work to which are assimilated works expressed by a process analogous to cinematography; a work of drawing, painting, architecture, sculpture, engraving or lithography; a photographic work to which are assimilated works expressed by a process analogous to photography; a work of applied art, an illustration, map, plan, sketch or three-dimensional work relative to geography, topography, architecture or science; a performance; a broadcast; a phonogram; a compilation of data to the extent it is protected as a copyrightable work; or a work performed by a variety or circus performer to the extent it is not otherwise considered a literary or artistic work.
- You** means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has been granted permission from the Licensor to exercise rights under this License despite a previous violation.
- Publicly Perform** means to perform public recitations of the Work and to communicate to the public those public recitations, by any means or process, including by wire or wireless means, including the making of a protected performance or the communication to the public of the performance of the Work, including by public digital performance; to broadcast and rebroadcast the Work by any means including signs, sounds or images.
- Reproduce** means to make copies of the Work by any means including without limitation by sound or video recordings and the right of fixation and reproducing fixations of the Work, including storage of a protected performance or phonogram in digital form or other electronic medium.

2. Fair Dealing Rights. Nothing in this License is intended to reduce, limit, or restrict any use or benefits arising from limitations or exceptions that are provided for in connection with the copyright protection under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

- To Reproduce the Work, to incorporate the Work into one or more Collections, and to Reproduce in any medium, in any form, the Work as incorporated in the Collections;
- to create and Reproduce Adaptations provided that any such Adaptation of the Work includes the Work, in its entirety, and must also include, to the extent practicable, a notice to the extent possible that clearly label, demarcate or otherwise identify that changes were made to the original Work. For example, a translation could be marked "The original work was translated into English by So-and-so" or a modification could indicate "The original work has been modified";
- To Distribute and Publicly Perform the Work including as incorporated in Collections; and,
- to Distribute and Publicly Perform Adaptations.

The above rights may be exercised in all media and formats whether now known or later devised. The above licenses include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. Subject to Section 8(f), all rights not expressly granted by Licensor are hereby reserved, including but not limited to the rights described in Section 4(c).

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

- You may Distribute or Publicly Perform the Work** only under the terms of this License. You must include a copy of, or the Uniform Resource Identifier (URI) for, this License with every copy of the Work You Distribute or Publicly Perform. You may not impose any terms on the Work that restrict the terms of this License or the ability of the recipient of the Work to exercise the rights granted to that recipient under the terms of this License. You may not sublicense the Work. You must keep intact and preserve all the notices that refer to this License and to the disclaimer of warranties with every copy of the Work You Distribute or Publicly Perform. When You Distribute or Publicly Perform the Work, You may not impose any additional technological measures on the Work that restrict the ability of a recipient of the Work from You to exercise the rights granted to that recipient under the terms of this License. This Section 4(a) applies to the Work as incorporated in a Collection; it does not require the Collection apart from the Work itself to be made subject to the terms of this License. If You create a Collection, upon notice from any Licensor You must, to the extent practicable, remove from the Collection any credit as required by Section 4(d), as requested. If You create an Adaptation, upon notice from any Licensor You must, to the extent practicable, remove from the Adaptation any credit as required by Section 4(d), as requested.
- You may Distribute or Publicly Perform an Adaptation** only under: (i) the terms of this License; (ii) a later version of this License with the same License Elements as this License; (iii) a Creative Commons jurisdiction license (either this or a later license version) that contains the same License Elements as this License (e.g., Attribution-NonCommercial-ShareAlike 3.0 US) ("Applicable License"). You must include a copy of, or the URI for, Applicable License with every copy of each Adaptation You Distribute or Publicly Perform. You may not offer or impose any terms on the Adaptation that restrict the terms of the Applicable License or the ability of the recipient of the Adaptation to exercise the rights granted to that recipient under the terms of the Applicable License. You must keep intact and preserve all the notices that refer to the Applicable License and to the disclaimer of warranties with every copy of the Work as included in the Adaptation You Distribute or Publicly Perform. When You Distribute or Publicly Perform the Adaptation, You may not impose any effective technological measures on the Adaptation that restrict the ability of a recipient of the Adaptation from You to exercise the rights granted to that recipient under the terms of the Applicable License. This Section 4(b) applies to the Adaptation incorporated in a Collection; this does not require the Collection apart from the Adaptation itself to be made subject to the terms of the Applicable License.
- You may not exercise any of the rights granted to You** in Section 3 above in any manner that is primarily intended for or directed toward commercial advantage or private monetary compensation. The exchange of the Work or other copies of the Work by means of digital information otherwise shall not be considered to be intended for or directed toward commercial advantage or private monetary compensation, provided there is no payment of any monetary compensation in connection with the exchange of copyrighted works.
- If You Distribute, or Publicly Perform the Work or any Adaptations or Collections.** You must, unless a request has been made pursuant to Section 4(a), keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or if the Original Author and/or Licensor designate another party or parties (e.g., a sponsor, institution, publishing entity, journal) for attribution ("Attribution Parties") in Licensor's copyright notice, terms of service or other reasonable means, the name of such party or parties; (ii) the title of the Work if supplied; (iii) to the extent reasonably practicable, the URI, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and, (iv) consistent with Section 3(b), in the case of an Adaptation, a credit to the user of the Adaptation in the form of a text file (e.g., a .txt file) or a work by Original Author, or "Screenplay based on original Work by Original Author". The credit required by this Section 4(d) may be implemented in any reasonable manner; provided, however, that in the case of an Adaptation or Collection, at a minimum such credit will appear, if a credit for all contributing authors of the Adaptation or Collection appears, then as part of these credits and in a manner at least as prominent as the credits for the other contributing authors. For the avoidance of doubt, You may not use the credit required by this Section for the purpose of attribution in the manner set out above and, by exercising "Your rights under this License," You may not sublicense the Work or any Adaptations or Collections with, sponsorship or endorsement by the Original Author, Licensor and/or Attribution Parties, as appropriate, of Your or Your use of the Work, without the separate, express prior written permission of the Original Author, Licensor and/or Attribution Parties.

- For the avoidance of doubt:**
 - Non-Exclusive Compulsory License Schemes.** In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme cannot be waived, the Licensor reserves the exclusive right to collect such royalties for any exercise by You of the rights granted under this License;
 - Waivable Compulsory License Schemes.** In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme can be waived, the Licensor reserves the exclusive right to collect such royalties for any exercise by You of the rights granted under this License if Your exercise of these rights is for a purpose which is otherwise excluded from commercial as permitted under Section 4(c) and otherwise waives the right to collect royalties through any statutory or compulsory licensing scheme; and,

- Voluntary License Schemes.** The Licensor reserves the right to collect royalties, whether individually or, in the event that the Licensor is a member of a collecting society that administers voluntary licensing schemes, by that society, from any exercise by You of the rights granted under this License that is for a purpose or use which is otherwise than noncommercial as permitted under Section 4(c).
- Except as otherwise agreed in writing by the Licensor or as may be otherwise permitted by applicable law,** if You Reproduce, Distribute or Publicly Perform the Work either by itself or as part of any Adaptations or Collections, You must not distort, mutilate, modify or take other derogatory action in relation to the Work which would be prejudicial to the Original Author's honor or reputation. Licensor agrees that in those jurisdictions (e.g., Japan), in which any exercise of the above rights by You of this License (the right to make Adaptations) would be deemed to be a distortion, mutilation, modification or other derogatory action prejudicial to the Original Author's honor or reputation, You may, to the extent necessary as appropriate, this Section, to the fullest extent permitted by the applicable national law, to enable You to reasonably exercise Your right under Section 3(b) of this License (right to make Adaptations) but not otherwise.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING AND TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, LICENSOR OFFERS THE WORK-AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND, INCLUDING ANY EXPRESS OR IMPLIED, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT, BUT THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO THIS EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. Termination

This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Adaptations or Collections from You under this License, however, will not have their licenses terminated provided such individuals or entities have not received the Work or Adaptations from You under this License in violation of the terms of this License. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.

Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

- Each time You Distribute or Publicly Perform the Work or a Collection, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.
- Each time You Distribute or Publicly Perform an Adaptation, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.
- If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
- No term or provision of this License shall be deemed waived and no breach constituted by the party to whom the license is given in writing and signed by the party to be charged with such waiver or consent.
- This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You to Licensor or on any media relating to the Work unless they are mutually agreed to by both parties and do not modify without the mutual written agreement of the Licensor and You.
- The rights granted under, and the subject matter referenced, in this License were drafted utilizing the terminology of the Berne Convention for the Protection of Literary and Artistic Works (as amended on September 28, 1979), the Rome Convention of 1961, the WIPO Copyright Treaty of 1996, the WIPO Performances and Phonograms Treaty of 1996 and the Universal Copyright Convention (as revised on July 24, 1971). These rights and subject matter have been incorporated in the applicable national law. If the standards suite of rights granted under applicable national law includes additional rights not covered by this License, such additional rights are deemed to be included in this License; this License is not intended to restrict the license of any rights under applicable law.
